

Introduction to the Essentials of Simulation with SimBaby

Friday, February 3, 2012

9:00 a.m. – 12:00 p.m. EST

NOSM East, MSE 215

** This is a face-to-face event. **

Program Description

Simulation is key to improving patient outcomes and helping save lives. Pediatric patients are usually challenging for our learners for a number of reasons, including the fact that exposure to peds cases can be sporadic. This introductory workshop will help provide the knowledge and skills to help you prepare, operate, and facilitate a pediatric simulation session. Opportunities will be provided for hands-on practice using the high fidelity SimBaby mannequin.

Objectives

By the end of this workshop participants will be able to:

- 1) Explain how simulation is used.
- 2) Identify new ways to effectively use simulation in clinical teaching.
- 3) Describe how to operate the SimBaby mannequin.

Presenter

Dr. Chris Kupsh, BSc, MSc, MD, CCFP (EM), FCFP

Dr. Chris Kupsh has been an Emergency Physician since 1996. As part of her duties, she has been Trauma Team Leader and occupied the post of Quality Assurance Officer for the Trauma Program (1999-2002). She has extensive experience with learners at all levels, from first year medical students to fifth year residents. Dr. Kupsh is presently the Evaluations Coordinator for the PGY3 Emergency Medicine Residency Program, the Procedural Skills and Practical Sessions Coordinator for the PGY 1 and 2 Family Medicine Residents and has been the Clinical Director for Simulation at the Northern Ontario School of Medicine (NOSM) for the past three years. Areas of interest for Dr. Kupsh include medical education and simulation.

Enrollment is limited.

Please register early.
