

HSN Grand Rounds and Lecture Series

Physiologic Variability Predicts Need for Hemorrhage Control in Geriatric Trauma

Presented by: Dr. Ram Venkatesh Anantha

CGHGR - 017010-A

Wednesday, February 14, 2018
7:00 a.m. – 8:00 a.m. EST

OBJECTIVES

By the end of the program, participants will be able to:

- Identify the risk factors for underappreciating shock state in geriatric trauma patients.
- Identify clinically relevant outcomes for analysis in geriatric trauma.
- Discuss the inter-relationship between clinical outcomes research and quality performance improvement research.

PROGRAM DESCRIPTION

The HSN Grand Rounds foster collaborative patient care and exchange of ideas across all disciplines in health care and medical education.

DISTRIBUTED LEARNING

Face to Face

HSN Level 2: Lecture Rooms A/B/C

Please specify your OTN location when registering.

PRESENTER

Dr. Ram Venkatesh Anantha is a clinical instructor in trauma and acute care surgery at the Wake Forest Baptist Medical Center in Winston-Salem, North Carolina. He attended medical school at the University of Ottawa and completed his general surgery residency in 2016 at the University of Western Ontario. During his training, Dr. Anantha participated in the Clinician-Investigator Program sponsored by the Royal College of Surgeons of Canada, and successfully defended a Masters of Science in Microbiology and Immunology. He has over 30 peer-reviewed publications and abstracts. Dr. Anantha's research interests include immune responses in intra-abdominal sepsis, as well as quality outcomes analysis using large data sets.
