

Bringing Together Best Practices From Distance and Continuing Education: The Best Practices for Stroke for Nurses Project

West Greater Toronto Area Stroke Network
 Laurentian University School of Nursing
 Ontario Telemedicine Network
 Spring 2007

Presenters

- Dr. Ellen Rukholm
erukholm@laurentian.ca
- Dr. Lorraine Carter
lcarter@otn.ca

Objectives

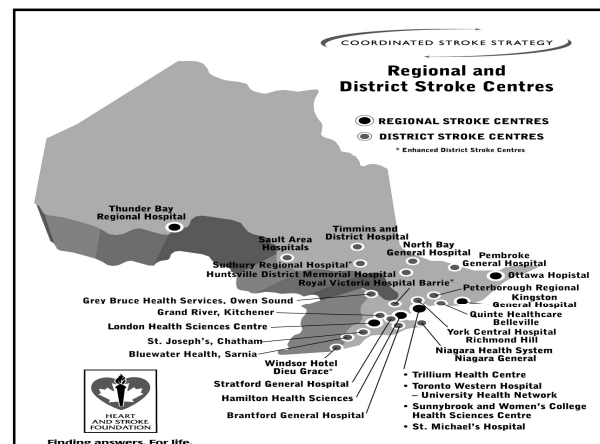

- To present the partnership model and project objectives
- To describe the project experience
- To review findings based on the research framework of the project
- To share lessons and recommendations

Background

- Ministry of Health and Long-term Care allocates \$30 million annually to the Ontario Stroke System
- Mandate: to decrease the incidence of stroke and improve patient care and outcomes
- System spans the continuum of care: prevention, acute care, rehabilitation, and community re-engagement

Background

- Guiding principles
comprehensive, integrated, evidence-based and province wide
- Professional education and public awareness integral to uptake of best practices

Partner 1: West GTA Stroke Network

- **One of 11 stroke regions in the province serving 1.6 million people**
- **Stakeholders and partners**
5 acute care hospitals, 1 tertiary rehabilitation centre, 48 long-term care facilities, community service providers
- **Regional Stroke Centre and Secondary Stroke Prevention Clinic located at Trillium Health Centre**

West GTA Stroke Region-2

- **Regional education funding allocated annually**
- **Stroke Best Practices for Nurses Workshop developed in 2001**
- **Delivered biannually in face-to-face setting**

Partner 2: Laurentian University School of Nursing

- **Rich history in distance, continuing, and technology-enabled education**
 - **Post-RN and Master's programs, specialty education such as cardiac**
- **Extensive experience in cardiac and stroke education**

Laurentian University School of Nursing-2

- **Relationships with hospitals and other health education stakeholders across northern Ontario**
- **Expertise in research and assessment in technology-enabled learning**

Partner 3: Ontario Telemedicine Network

- **Provincial telemedicine network**
- **www.otn.ca**
- **Highly active educational program through presence in all Ontario hospitals and other health education settings (over 400 multipoint events per month)**

Ontario Telemedicine Network-2

- **Educational technologies include videoconferencing and webcasting (live and archived)**
- **LU School of Nursing a member of OTN**

More Partners: Northern Ontario Hospitals

- Over 90 nurse-participants from across large and small hospitals
- Support of administration and ethics review boards within involved hospitals

Stroke Best Practices for Nurses Workshop

- Originally developed as a “train the trainer” model
- Team of interdisciplinary expert presenters
- Delivered over three days

Stroke Best Practices for Nurses Workshop-2

- **Topics include:**
neuroanatomy, management of incontinence, stroke prevention, management of the stroke survivor with cognitive and perceptual issues, community reintegration, post-stroke depression

An Idea with Purpose

- To develop, deliver, and evaluate a technology-enabled stroke education program that
 - shares educational content with nurses in remote areas
 - promotes uptake of best practices through collaboration and partnership
 - identifies human and technology supports required to sustain learning
 - includes a research framework

Research Framework

- **Research objectives**
 1. To evaluate the impact of educational modalities on nurse-learners’ knowledge exchange, self-efficacy, and critical thinking
 2. To document the nurse-learners’ experiences of the technology-enabled learning setting

Educational Technologies

- **Videoconferencing:** three one-hour topic-oriented sessions
- **Webcasting:** live and archived
- **Web-based learning site using WebCT learning management system:**
 - supported independent learning
 - provided learning resources
 - facilitated online assessment and surveys

Components of Project

- Occurred over four consecutive weeks
- **Week 1:** **Orientation, training sessions**
- **Week 2:** **Neuroanatomy and Cerebral Circulation**
- **Week 3:** **Management of Cognitive and Perceptual Disturbances**
- **Week 4:** **Assessment and Treatment Strategies for the Management of Aphasia**

Learning Activities

- **WebCT bulletin board postings**
- **Case studies**
- **Observation of video clips and completion of questions**
- **Focus in all activities: reflection and application of strategies learned**

The screenshot shows the WebCT interface for the course 'Stroke Best Practices for Nurses'. It includes a navigation bar with 'myWebCT', 'Resume Course', 'Course Map', 'Log Out', and 'Help'. The main content area features a 'Homepage' section with a title graphic and a welcome message. The welcome message states: 'Welcome to the pilot offering of the Stroke Best Practices for Nurses education module, in partnership with Laurentian University's School of Nursing, NORTH Network, Headwaters Health Care Centre, Northeastern Ontario Stroke Region, Northwestern Ontario Stroke Region, and the West GTA Stroke Network. This educational opportunity has been developed with the support of the Ministry of Health and Longterm Care (MOHLTC) and is based upon an existing workshop, Stroke Best Practices for Nurses. Your participation in this workshop is key to its success and sustainability. As this is a pilot project, we welcome your input on how to make this a better experience for all involved. This is your opportunity to help shape future educational opportunities for you and your colleagues.' Below this, there is a statement: 'We look upon this as an adventure in learning for all of us, and hope we can have some fun while we are doing it!' followed by links for 'About the Presenters' and 'About the Bulletin Board'. At the bottom, there are three small images labeled 'Workshop Material', 'Bulletin Board', and 'Web Links'.

The screenshot shows the 'Table of Contents' page. It lists several sections: 'About the File Formats' (with links for 'Webpage Format' and 'PDF Format'), 'Calendar of Events and Release Dates' (with a link 'Click here for the calendar'), and 'Workshop Presentations'. Under 'Workshop Presentations', there are three entries: 1. 'Neuroanatomy and Cerebral Circulation Review: Linda Kelloway' with links for 'Webpage Format', 'PDF Format', 'Additional Material', and 'Learning Activity'. 2. 'Strategies to Manage Cognitive and Perceptual Disturbances in Clients with Stroke: Joan Shaw' with links for 'Webpage Format', 'PDF Format', 'Additional Material', and 'Learning Activity'. 3. 'Assessment and Treatment Strategies for the Management of Aphasia in Stroke Patients: Holly Sloan' with links for 'Webpage Format', 'PDF Format', 'Additional Material', 'Learning Activity', 'Aphasia Document Objects (PDF)', and 'Aphasia Document Mac (PDF)'.

The screenshot shows a presentation slide titled 'Neuroanatomy and Cerebral Circulation Review' by Linda Kelloway, presented for The West GTA Stroke Network in January 2006. The slide features a table of contents on the left side with 22 items: 1. Neuroanatomy and Cerebral Circulation Review, 2. Objectives, 3. Left and Right Hemisphere, 4. Left and Right Hemisphere, 5. Cerebrum, 6. Motor and Sensory Function, 7. Cerebral Circulation Review, 8. Blood Supply to the Brain, 9. Circulation Review: Circle of Willis, 10. Circle of Willis, 11. Frontal Lobe, 12. Anterior Cerebral Artery, 13. Middle Cerebral Artery, 14. MCA - Key Functional Areas, 15. Parietal Lobe, 16. Posterior Cerebral Artery, 17. Temporal Lobe, 18. Occipital Lobe, 19. Diencephalon, 20. Cerebellum, 21. Vertebrobasilar Circulation, 22. Brain Stem. The slide also includes logos for the West GTA Stroke Network and Laurentian University School of Nursing.

The screenshot shows a 'Learning Activity' page. It contains the following text: 'In this learning activity, you are asked to read two case studies and post your answers on the Bulletin Board. Please make your posting in the section of the Bulletin Board called Neuroanatomy and Cerebral Circulation Review: Linda Kelloway.' Below this, it says: 'Although you are welcome to present your answers in point form rather than in sentences, be sure that all point form answers are clear and complete. If you have additional comments to make based on something you have learned in the relevant nursing literature on stroke, please feel free to add this information to your answer.' At the bottom, there are links for 'Case Study A' and 'Case Study B'. There are also '[close window]' buttons in the top right and bottom right corners.

Research Methodology

- Pre and post mixed methods design
- Questionnaires, surveys, threaded asynchronous bulletin board contributions, and focus groups
- Carper's framework, Fundamental Ways of Knowing (Johns, 1995)
- Purposive sample of 96 participants
- Ethics approval from all hospital sites and Laurentian University

Results

- **Demographics:**
 - **Mean age:** 43 years
 - **Gender:** 98% Female
 - **Residency:** 94% from Northern Ontario
 - **Mean years/practice:** 17 years
 - **Mean years/stroke:** 8.8 years

Satisfaction with Technology Components: Pre

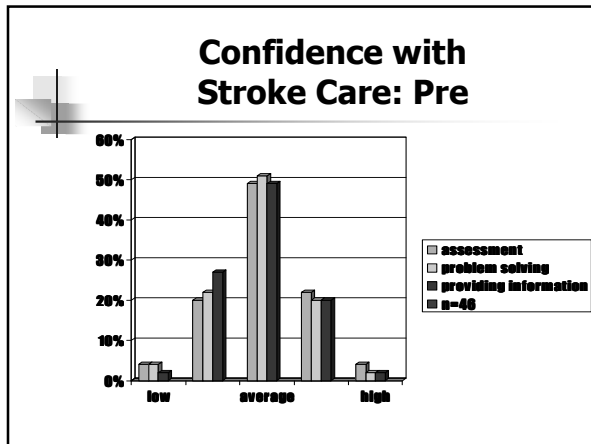

Satisfaction with Technology Components: Post

Technologies: Summary

- Improvements in all areas
- Most dramatic in
 - webcasting
 - general use of the Internet
 - general use of the computer
 - Writing

- ### Stroke Care: Summary
- Improvements in all areas
 - Most dramatic in
 - solving difficult problems
 - providing information to health care team

- ### Other Findings
- 93% respondents reported enhancement of critical thinking skills
 - evidence of different kinds of thinking in discussion board contributions
 - the majority showed strong improvement in knowledge through multiple choice quizzes

- ### Lessons
- Highly successful despite short time frame to organize
 - Content regarded as excellent but too heavy
 - Appreciated mixed technology approach

- ### Recommendations
- Needs assessment to determine future topics
 - Analysis of impact on development of expertise
 - Conduct environmental scan for funding

Final Thoughts

- Establishment of partnerships between experts in practice, care continuum, and organizations
- Development of program into university-level course for credit
- Long-term evaluation of knowledge translation into practice

Final Thoughts

"I thought the course was really great and one thing I thought about was there would be no way we'd get this many northerners to one course except for this way (using technology), so way to go!"

Special Acknowledgements

- Rhonda Ferguson, Educational Administrative Assistant
- Nadia Hladin, Regional Program Manager, West GTA Stroke Network
- Linda Kelloway, Lead Content Nursing Expert, Clinical Educator
- Linda Liboiron-Grenier, Research Assistant
- Sharolyn Mossey, Director, School of Nursing

Special Acknowledgements

- Catharine Schroeder, Educational Technologist
- Joan Shaw, Content Expert, Clinical Educator
- Holly Sloan, Content Expert, Speech Language Pathologist
- Mary Wheelwright, Project Manager
