Learning Objectives:

By the end of the presentation, the participants will be able to:

1. Discuss the collaborative role of the primary care physician in caring for patients throughout their cancer journey including diagnosis, treatment, remission and palliation.
2. Identify tools to aid in the management of patients before, during and after cancer diagnosis.
3. Utilize resources in Northern Ontario accessible to patients dealing with cancer care and survivorship.

Sessions

Thrombosis Update in Cancer - Dr. Ann-Marie McKenna

- Evaluate the evidence behind thrombosis treatment in cancer patients
- Implement new evidence for thrombosis treatment in primary care

Treating Post Chemotherapy and Radiation Complications- Lisa Dupre, MJ Forget, Susan Woodman, Darren Renaud

- Explore the treatment options for chronic lymphedema
- Apply pelvic floor physio as part of pre and post cancer treatment
- Identify the role for and difference between myofascial mobilization and scar mobilization

Apps for your Practice- Dr James Truong

- Evaluate the electronic resources available for patients and their healthcare providers for cancer screening, prevention and treatment
- Integrate the use of electronic resources into primary care for cancer patients

Oncology Pearls for the Family Doctor- Dr Lacey Pitre

- Describe chemotherapy agents commonly used in cancer treatment
- Explain potential side effects of cancer treatment modalities

Anti-hormonal Therapies for the Primary Care Provider- Dr Meghan Cusack

- Evaluate the risks and benefits of antihormonal treatment in breast cancer
- Identify how to select appropriate treatment for side effects of anti-hormonal treatments in breast cancer

Colon Cancer Screening Update- Dr Scott Shulman

- Explore current colon cancer screening guidelines and proposed changes
- Compare the new Fecal Immunochemical Test to current colon cancer screening practices for low, average and high-risk patient populations

Pharmaceutical pearls: neuropathy, pain and xerostomia- Kristie Chute

- Discuss treatment alternatives for neuropathies and inflammatory conditions in patients with acute or chronic pain
- Explore unique oral dosage forms available for people who have dysphagia or xerostomia
- Discuss the benefits of compounded medications including customized dosage strength, customized route of delivery, exclusion of unwanted ingredients and combination therapy

Well Follow Up Cancer Care: EMR Tools for Practice- Dr Mario Elia

- Explore tools designed to optimize and improve cancer well follow up in the community
- Integrate EMR tools into your current work flow to provide high quality cancer well follow up in primary care
