

Postponement of PA clinical rotations

March 31, 2020

Dear Physician Assistant Preceptor,

As the COVID-19 situation continues to unfold, the Physician Assistant program has decided to postpone all clinical rotations for our PA students until July 6, 2020. We will be reviewing the situation, and the appropriateness of this decision, continuously. We will contact you when it appears appropriate to resume the in-person clinical education portion of the Physician Assistant Program.

As always, we thank you for your support of our students and your commitment to our program. The safety of our patients, students, and you, our colleagues, is our priority. We will endeavour to maintain the best educational experience for our PA trainees, as much as possible during these challenging times – and we appreciate your patience.

If you have any further questions, please feel free to contact Britton Sprules, bsprules@nosm.ca

Sincerely,

Britton Sprules
