

NOSM COVID-19 Weekly Clinical Rounds

COVID-19: Optimizing effective virtual clinical care

May 22, 2020

MODERATOR

Barb Zelek MD, CCFP (*Associate Professor*)
Section Chair, Family Medicine

PRESENTERS:

Andrew Pearce MD, FRCPC (*Assistant Professor*)
Head, Radiation Oncology Sudbury HSN
Regional Radiation Oncology Lead, North Eastern Ontario

Andrew Kuchtaruk MD, CCFP (*Assistant Professor*)
Medical Director, Extendicare Falconbridge & Extendicare York

Adam Moir MD, CCFP (*Associate Professor*)
Lead, Dryden Medical Education Group LEG

DESCRIPTION:

Virtual clinical care has grown incredibly during the COVID-19 pandemic. In Northern Ontario physicians, healthcare professionals and clinical teams rapidly pivoted to provide effective patient centered virtual services within primary care, community hospitals and academic health sciences centres. Virtual care has been a critical part of the flatten the COVID-19 curve strategies. As our communities move from staying at home to returning to work, the need for virtual clinical care will continue.

JOIN US AS WE EXPLORE KEY QUESTIONS:

1. How are we effectively communicating with patients virtually?
2. How are we engaging patients in virtual care?
3. What have we discovered and implemented to provide effective virtual care?
4. How can we learn from each to further develop our virtual clinical care skills?

5. Identify challenges to the management and development of effective COVID-19 treatment and vaccination.
