Postgraduate Medical Education Professionalism

Approval Authority: Postgraduate Medical Education Committee
Established On: 2018 09 07
Category: B

1.0 POLICY STATEMENT
Developing a professional identity and learning professional behaviour is a vital and complex part of medical training that is expected by members of the profession, patients and the general public. Medical professionalism is underpinned by a variety of values, ethics and belief systems forming a “social contract in health care” (Cruess & Cruess, 2014). Professional behaviours and attitudes grounded in effective communication and collaboration are directly linked to patient safety and outcomes.

The purpose of this policy is to provide a framework to guide professionalism teaching, coaching, and assessment and to clarify broad expectations across all programs.

2.0 SCOPE
This policy applies to all residents. All members of NOSM University’s Postgraduate Medical Education portfolio including administrative staff, managers, faculty, and residents are expected to be familiar with this document and adhere to its principles.

This document does not replace training objectives or specific assessment tools; it broadly defines expectations and links to the NOSM Postgraduate Medical Education Policy and Procedures for the Assessment of Resident Performance (also see CBME version).

Professionalism is a wide-ranging requirement encompassing many aspects of physicians’ work. Requirements are specifically outlined in various ways including but not limited to: NOSM University assessment tools, Residency Program and PGME Office orientation documents, Hospital Codes of Conduct, regulatory and legislative requirements, and NOSM University clinical and academic goals and objectives based on the Royal College of Physicians and Surgeons CanMEDs Framework & the College of Family Physicians of Canada Evaluation Objectives.
The nature of professional behaviour is such that in each circumstance of exemplary professionalism or breaches/concerns there are multiple factors that are taken into consideration for decision making/judgements.

Therefore, this policy is not intended to be an exhaustive list of professional behaviours, timelines and related consequences; rather, this document identifies domains of professionalism and general expectations within categories. An outline of the key subdomains, the CanMEDs roles they reflect, and descriptive examples of behaviours both consistent and inconsistent with professional practice are documented in the NOSM University PGME Professionalism Matrix of Examples Document (see Appendix A).

3.0 DEFINITIONS

3.1 Associate Dean Postgraduate Medical Education (AD PGME)

The senior faculty officer responsible for the overall conduct and supervision of postgraduate medical education at NOSM University. The AD PGME reports to the NOSM University Dean.

3.2 Postgraduate Medical Education Office

The administrative office responsible for the admission, registration, policy and operational support of all postgraduate medical education residency programs.

3.3 360 Reviews

A process used to solicit information from a variety of workplace sources on a resident’s work-related behaviour and/or performance; also known as multi-rater or multi-source feedback.

3.4 Remediation

A period of additional individualized structured training and monitoring initiated when resident performance is below minimal standards but above unacceptable standards with the goal of ensuring that resident performance moves to and stays above those minimal standards.
3.5 **Workplace Based & In-training Assessments**

The assessment of a resident's professional skills and attitudes should provide evidence of appropriate everyday clinical competences including professionalism. As examples, multi-source assessment tools such PULSE 360, Professionalism Mini-Evaluation Exercise (PMEE), Observed Structural Clinical Exams (OSCEs), Structured Assessments of a Clinical Encounter (STACER's) etc. capture data on the demonstration of professionalism competencies. In-training Evaluation Reports (ITERs) and In-training Assessment Reports (ITARs) also document professionalism competency levels and narrative feedback.

### 4.0 PROCEDURES

It is recognized that stressful and difficult situations may give rise to unprofessional actions at times. The ability to accept responsibility for such actions, and to learn from error and grow as a physician is a measure of professionalism.

#### 4.1 Assessment Procedures – Clinical & Academic Domains

4.1.1 The procedures for the assessment of resident clinical performance, inclusive of professionalism domains, are detailed in the NOSM Postgraduate Education Policy and Procedures for the Assessment of Resident Performance (CBME version). This document refers to assessment requirements, remediation, appeals, suspension and dismissal.

#### 4.2 Assessment Procedures – Administrative Professionalism/ Interactions

4.2.1 The procedures for documenting and addressing administrative professionalism issues outside of the clinical and academic environment are as follows:

- Administrative staff from residency programs, the PGME Office, training site staff, and NOSM University support offices (HR, Finance, Housing, Electives etc) may communicate in writing factual accounts of unprofessional interactions (verbal and/or written) and actions to the Program Director.

- Residents will be provided with the correspondence and given an opportunity to comment on the nature of the incident and to provide a written response.
• The Program Director, acting upon the direction of the Residency Program Committee (RPC), will consider the nature of the concerns and determine appropriate resolution. File documentation related to the concern will be saved in the resident’s file and may form part of aggregate multi-source feedback on professionalism concerns that may require coaching and/or remediation.

• Administrative professionalism encompasses, but is not limited to respectful and timely communication and responses to NOSM University administrative staff and faculty, payment of administrative fees by communicated deadlines, complying with NOSM University Travel Management and General Expenses Policy, and compliance with various institutional deadlines.

5.0 RELATED DOCUMENTS
This policy is intended to complement Canadian law, policies, guidelines and codes of conduct established for the profession of medicine, and other policies, regulations and ethical standards that govern residents, faculty and staff of NOSM University.

In support of this policy, the following [related policies/documents/companion/forms] are included:

NOSM University Documents and Information

• NOSM University Postgraduate Medical Education Policy and Procedures for the Assessment of Resident Performance

• NOSM University Postgraduate Medical Education Policy and Procedures for the Assessment of Resident Performance Assessment-CBME version

• NOSM University Faculty Handbook Section 7: Professionalism for Clinical Faculty: Clinical Sciences Division Professionalism and Code of Conduct Policy, Procedures and Professional Attributes Guidelines.

• NOSM University Travel Management and General Expenses Policy
External Partner Organizations

- **Canadian Medical Association – Code of Ethics**

- College of Physician and Surgeons of Ontario:
  1. [Physician Behaviour in the Professional Environment](#)
  2. [Professional Responsibilities in Medical Education](#)

| Task completion | Failure to complete required tasks including administrative tasks in a timely fashion and as required by training site and program administration.  
(e.g. Does not pay administrative fees or return documents by deadlines) | Completes required tasks including administrative tasks in a timely fashion and as required by training site and program administration | Demonstrates leadership for system improvement, anticipates needs and is proactive in ensuring task completion.  
(e.g. participates in a committee to streamline administrative processes) | Expert  
Leader  
Advocate  
Professional |
| Honesty       | Dishonest, falsifies or purposefully omits information  
(e.g., Purposefully claims a travel reimbursement not directly required by a claimant such as a personal meal for a partner, signs in for others at academic events) | Demonstrates truthfulness and honesty in all interactions | Discloses proactively and effectively to improve patient care and educational environment  
(e.g. Discloses a medication error to preceptor even though it was caught and corrected before the patient received the medication) | Collaborator  
Professional |
